separation

Climat Screen Hygiene Foil

To protect your employees and customers against corona contamination, we now offer a practical Climat Screen foil solution with which a physical separation can be created to give bacteria and viruses no chance.

The transparent foil has a material thickness of 1 mm and is ideal for face protection solutions.

Advantages of the hygiene foil:

- offers a crystal clear view;
- easy to clean and disinfect;
- easy to mount e.g. by hanging clips or closing strip;
- can be installed in combination with a roller blind system;
- very sustainable because it is made of scratch resistant material;
- cheaper than Plexiglass.

The hygiene foil is available on a roll (152 cm width) or cut lengths. Take action against the corona virus and order your foil today. Interested in a ready-to-mount system? Ask for the possibilities.

Total solar energy:

transmitted	81 %
reflected	9 %
absorbed	10 %
UV Transmittance (300 – 380 nm)	< 1 %

Visible light:

transmitted	89 %
reflected	8 %

Properties

- not adhesive
- one-side scratch insensitive surface
- width of film 1520 mm
- material thickness 1 mm
- crystal-clear material

Assembly instruction

We recommend shortening the film in the edge area left and right by 1 cm each, as otherwise a slight wave formation over the entire width cannot be excluded.
